RE: Notification of Anticipated Start-up per MD-995 Issued April 6, 2004

Dear Dave:

The purpose of this correspondence is to notify you of the anticipated start-up date of the "A" Calciner and other associated sources per MD-995 issued April 6, 2004.

The "A" Calciner shares a common stack with the "B" Calciner, AQD #17. Initial start-up of the "A" Calciner is scheduled for October 16, 2006. The Division will be notified of the actual start-up date within 15 days after that date. The annual hourly restriction of three coal sources AQD #s 10, 11, and 14 was lifted during the permitting action of MD-995, and will be considered "started-up" when the "A" Calciner is operational. AQD #100 is scheduled to start-up that same date.

If you have any questions concerning the start-up schedule, feel free to contact me at 875-7944.

Respectfully submitted,

Dolly A. Potter  
Environmental Services Supervisor
